Dear Jordan Pitt

Congratulations, the Associate Dean has recommended you be awarded the degree of Doctor of Philosophy, subject to amendments required by examiners being made and submission of a new version of the thesis through the eForm. Please contact your supervisor regarding the amendments to be completed in the thesis. Amendments are to be made to the satisfaction of the Delegated Authority. When corrected, the revised copy should be submitted through the eForm, so the Delegated Authority can certify to the Associate Dean that the corrections have been completed appropriately.

The Research Award Rules state you have 12 months after this notice to make the specified corrections or revisions and submit the corrected or revised thesis to the Delegated Authority for review. Not submitting a corrected or revised thesis within this timeframe will result in a fail grade.

Therefore, your corrected thesis must be submitted through the eForm no later than 01/04/2020. You will not be an enrolled student at the University during this period; however, you will retain building and library access during this time.

Anonymous examiners reports are enclosed.

You can change your title and abstract when submitting a revised copy of your thesis.

Please note for you to be eligible for the graduation ceremonies, where degrees are conferred, the corrected copy of your thesis must be submitted and approved by the Associate Dean for the award of the degree no later than six weeks before the graduation ceremony. **You will not be able to commence using your doctoral title until the degree has been conferred.**

If you have any questions about the thesis examination process, please contact researchthesis.enq@anu.edu.au.

Yours sincerely,

Ariel Edge
